

Facilities

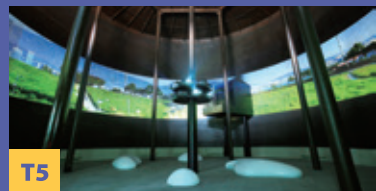

Culture Yard
Outdoor plaza where large-scale festivals and various cultural events are held. You can enjoy picnics with your family in the spacious yard, and also explore outdoor art installations.

Glass Pavilion
A tank that used to store gasoline. It was dismantled and refurbished with glass walls and roof to be reborn as a pavilion. It is now used as space for exhibitions, performances, workshops, and filming.

Sustained Oil Tank
A tank which used to store diesel fuel. The original shape of has been completely preserved. It has been designated as a future heritage of Seoul to be passed down to future generations.

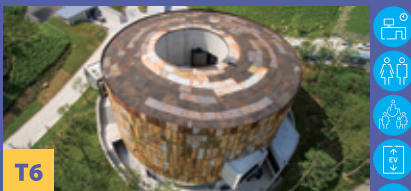

Exhibition Hall
A repurposed tank that once stored kerosene, now transformed into a flexible exhibition space accommodating a variety of exhibitions and programs.

Concert Hall
A tank that used to store diesel fuel. The upper part was turned into an outdoor stage and the lower part into a performance hall, where various events such as music performances, dances, and lectures are held.

Culture Complex
The inside of the tank which used to store kerosene was preserved and regenerated as a cultural complex where a variety of cultural and artistic events are held using the echoing effect and darkness of the space with gigantic steel walls and pillars as the background.

Community Center
T6 Community Center is a newly built structure using steel plates dismantled from T1 and T2. You can meet community spaces such as cafeteria, round conference room and creative lab, eco-lounge in a small eco-library, and a rooftop floor where you can look up at the sky.

Opening of a Secret Space

Mapo Oil Depot, which was banned from public access, was a first-class security facility that stored about 69.07 million liters of oil in a total of five oil tanks. It was closed for safety concern in the wake of the 2002 World Cup, but was reborn as Oil Tank Culture Park in September 2017 through a public contest.

Filling Oil Tanks With Culture

Oil Tank Culture Park has become a cultural park through the efforts of cultural regeneration of urban renewal that preserves the characteristics of the oil depot. The tanks that used to store oil became cultural spaces where exhibitions, performances, and festivals are held, the empty plaza became a cultural garden, the dismantled steel plates were upcycled and turned into a community space, and the surrounding flowers and trees became a beautiful park. This place, which represented the industrialization era, has now been reborn as an eco-cultural park centered on eco-friendliness, regeneration, and culture. Oil Tank Culture Park's tanks will continue to be filled with culture together with citizens, artists, and activists as a cultural park for the public.

Oil Tank Culture Park Programs

Exhibitions & Performances
Oil Tank Culture Park hosts multidisciplinary exhibitions and performances, including media and public art, in harmony with nature and art.

Festivals & Events
Oil Tank Culture Park hosts various cultural festivals and events with citizens all year round in its Culture Yard.
